

Join "[7 Days to Kick-Start Earth 2.X](#)" - A Story Making Experiment Using a Secret Facebook Group. Invite (PDF) from Willi Paul, Planetshifter.com

How to join us:

- Send me a Facebook Friend Request at William Paul (pscompub at gmail.com)
- I will accept your request and add you to the group

The Story:

- The journey begins when the space ship touches down on Earth 2.X
- To get started, the space craft is transformed into a barracks, a greenhouse is set-up, solar panels go up...
- This is a role play! Jump in with your agenda!

The Tool:

- This group story making experiment uses a secret Facebook Group (i.e. chat box)
- The story of the exploration and settlement plan for Earth 2.X will be advanced by each participant, text by text
- The final discussion or “text stream” (the entire dialogue) is the story

Who should participate?

- The “mission” lasts for 7 days; 20+ folks are needed to co-write the story -
- Earth 2.X participants are real people - no avatars, video games or joysticks!
- Artists, writers, engineers and spiritual folks can contribute their ideas via a text discussion
- People with a desire to write new stories with online tools
- Folks who want to create a new world
- There is no limit to how many ideas or texts each member can submit

Participants are encouraged to incorporate these topics as the 7 day mission evolves:

- Energy
- Ecology
- GMO
- Permaculture
- Nature
- Solar
- Shelter
- Community
- Spirit
- Transition Movement

Goals:

- Test an asynchronous, online story creating process using FB
- Discuss an **initial settlement plan** for a Earth 2.X – a planet that is similar to Earth
- Is “text stream” a useful term for this task?
- What are some Implications or instructions for problems on present day Earth?
- Test a new [Myth Lab 3.0](#) scheme as follows:

text > multiple texts > chat > multiple chats > text stream (discussion) > story > 10 elements of new myths > new myth

Mission Moderator:

Willi Paul will set the stage for the exercise on Day 1 then monitor the discussion and offer ideas and re-directs as the experience unfolds.
